## PROJECTS

### LOGIN SYSTEM

Personal Project using Python

NOVEMBER 2023-JANUARY 2024

-Creating fully functional working login system using python. This login panel in python is full functional and working. Because whenever we keep our username and password field empty, it will show a error message to the user that "all fields required". If we put incorrect password or username, it will show another error message to the user that "Invalid username or password". And if we put correct password and username it will show a welcome message to the user.

### BUILD WEATHER APP

Personal Project using Python

JANUARY 2024 – FEBRUARY 2024

-I have developed a comprehensive weather application using Python, demonstrating proficiency in web scraping, API integration, and data visualization. I efficiently fetched real-time weather data, offering users accurate forecasts. By incorporating intuitive user interfaces and graphical representations, I ensured a seamless user experience.
